MAGNETIC SEPARATORS

We build magnetic separators for every kind of service to which such machines are adapted. It is our exclusive business. Our aim has been to develop this particular class of machinery to the highest possible degree of perfection.
We maintain a laboratory for the purpose of testing and treating ores and in this manner are able to determine the proper type of separator.
For exceptional cases, we are admirably equipped to design a magnetic separator suitable for the purpose.
Over 3500 satisfied customers.

Edwards Metal Ceilings and Walls

Economical
Ornamental
Sanitary
Permanent
Fireproof
Moistureproof
Verminproof

Metal Ceilings are no longer a luxury—they may almost be said to be a necessity. Where formerly they were used almost exclusively in churches, stores, halls and other buildings, they are now also extensively used in private residences, factories, etc. Metal is the most sanitary and easiest to keep clean of any ceiling, is absolutely fire, moisture and verminproof, makes the room cool in summer and warm in winter and there is absolutely no danger from falling plaster.

Write for Large "Ceiling" Catalog "H" Showing Complete Line.

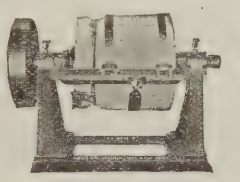
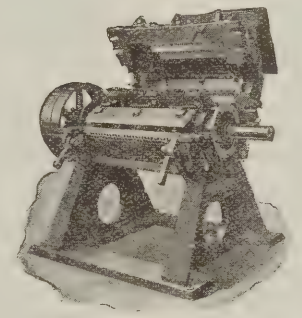
INQUIRIES

When making inquiries it will greatly facilitate matters if the following information is given: (1) Material to be reduced; (2) How coarse it will be when fed; (3) Fineness of finished product; (4) Capacity per hour; (5) Whether wet or dry; (6) If electric motor drive is desired, the current characteristics should be given.



Combination Laboratory Mill.

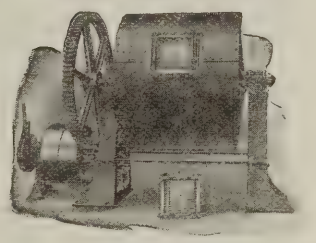


ABBÉ LABORATORY MILLS

These machines are equipped with high quality porcelain jars and are particularly suited for pulverizing small quantities of material and are used extensively in testing laboratories.

They are built with any number of jars and for motor drive if desired.

Single Jar Mill

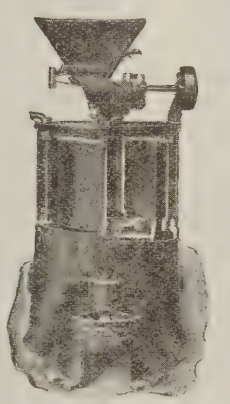


Showing Cutter Open

ABBÉ ROTARY CUTTER

This machine consists of a number of revolving knives which rotate in a casing carrying stationary knives. The material is fed through a hopper, is cut up by the knives and is discharged through a screen at the bottom which regulates the fineness.

The Abbé cutter is used for such materials as: Drugs, dyewood, corn, hay, paper, straw, rags, rubber, spices.



Abbé Pebble Mill
(Patented)

ABBÉ PEBBLE MILL

For pulverizing and mixing (wet or dry) various kinds of material. Require no skilled labor and will operate for years without repairs.

These mills are equipped with either silex, porcelain, cast iron, steel or wood linings. Either porcelain, iron or steel balls or flint pebbles are used as a grinding medium.

A few of the materials that can be ground in these mills are as follows: Aniline Colors, Barytes, Enamel, Feldspar, Silica, Coal, etc.

ABBÉ IMPROVED "MAX" MILL OR DISINTEGRATOR

This mill is particularly useful for granulating and pulverizing soft or medium hard materials which are non-abrasive. The fineness of the finished product is regulated by a readily interchangeable screen.

Some of the materials ground in the "Max" mill are: Alum, bone charcoal, chemicals, colors, gums lime, ochre, rosin, salt, sugar and spices.
